Operations Research Letters 11 (1992) 329–331
North-Holland

June 1992

Author Index to Volume 11 (1992)

The issue number is given in front of the page numbers

Aghezzaf, E.H. and L.A. Wolsey, Lot-sizing polyhedra with a cardinality constraint (1) 13– 18
Anstreicher, K.M., On interior algorithms for linear programming with no regularity assumptions (4) 209–212
Barbosa, V.C., *see* de Carvalho, L.A.V. (3) 141–145
Baxter, L.A. and F. Harche, On the optimal assembly of series–parallel systems (3) 153–157
Birge, J.R., R.M. Freund and R. Vanderbei, Prior reduced fill-in in solving equations in interior point algorithms (4) 195–198
Bollobás, B. and A. Meir, A travelling salesman problem in the k-dimensional unit cube (1) 19– 22
Buzacott, J.A., *see* Liu, X.-G. (4) 233–242
Carlson, R.C., *see* Kouvelis, P. (1) 61– 65
Cavazos-Cadena, R. and L.I. Sennott, Comparing recent assumptions for the existence of average optimal stationary policies (1) 33– 37
Chern, M.-S., On the computational complexity of reliability redundancy allocation in a series system (5) 309–315
Csirik, J., H. Kellerer and G. Woeginger, The exact LPT-bound for maximizing the minimum completion time (5) 281–287
de Carvalho, L.A.V. and V.C. Barbosa, Fast linear system solution by neural networks (3) 141–145
Felten, E.W., *see* Martin, O. (4) 219–224
Fishman, G.S. and D.S. Rubin, Bounding the variance in Monte Carlo experiments (4) 243–248
Freund, R.M., *see* Birge, J.R. (4) 195–198
Gal, T. and F. Geue, A new pivoting rule for solving various degeneracy problems (1) 23– 32
Gallego, G., A minmax distribution free procedure for the (Q, R) inventory model (1) 55– 60
Gautier, A. and F. Granot, A parametric analysis of a nonlinear asset allocation management model (5) 273–279
Geue, F., *see* Gal, T. (1) 23– 32
Ghosh, M.K. and S.I. Marcus, On strong average optimality of markov decision processes with unbounded costs (2) 99–104
Granot, D. and D. Zuckerman, Training and job search in the labor market (2) 87– 92
Granot, F. and M. Penn, On the integral plane two-commodity flow problem (3) 135–140
Granot, F., *see* Gautier, A. (5) 273–279
Gyetvàn, F. and Y. Shi, Weak duality theorem and complementary slackness theorem for linear matrix programming problems (4) 249–252
Harche, F., *see* Baxter, L.A. (3) 153–157
Haviv, M. and M.L. Puterman, Estimating the value of a discounted reward process (5) 267–272
Hoogeveen, J.A. and S.L. van de Velde, A new lower bound approach for single-machine multicriteria scheduling (1) 39– 44
Hu, J.-Q., Variance properties of sample path derivatives of parametric random variables (1) 47– 54
Huang, S., *see* Zhu, J. (5) 289–291
Jackson, P.L., *see* Tunçel, L. (4) 255–259
Jha, S., *see* Pardalos, P.M. (2) 119–123
Kalantari, B., Generalization of Karmarkar's algorithm to convex homogeneous functions (2) 93– 98
Kellerer, H., *see* Csirik, J. (5) 281–287
Kogan, Y., Another approach to asymptotic expansions for large closed queueing networks (5) 317–321
